General Dimensions

Wall Opening Requirements

Installation of the mirror door requires a wall opening with the below noted dimensions. Opening dimensions may vary by up to 1/8".

Mirror Installation Steps

Required Tools: 1. Drill with #2 Phillips bit. 2. Level 3. Wood shims.

Step 1

Fit your mirror door into the prepared opening.

Step 2

Level and plumb the door using your level and shims.

Step 3

Secure the door frame to the studs with the included screws using a drill and driver.
